

Exhibit 5-2. Measure 2: Parental interest in following up on the local agency referral (Safety Check Parental/Guardian Post-Visit Survey)

Domain:	Readiness for behavior change	Element/relationship:	Patient
Instrument:	Safety Check Parental/Guardian Post-Visit Survey		
Purpose:	Clinicians in the <i>Pediatric Research in Office Settings</i> program were trained on providing violence prevention-related community referrals. This measures the parent's level of interest in following up on the local agency referral.		
Format/data source:	Patient/Individual Survey		
Measure type:	Process	Date:	2006
Preventive service/ USPSTF:	Other–Mental Health*		
Clinical practice:	Primary care–Pediatrics		
Denominator:	Number of respondents to parent/guardian post-visit survey (Q3)		
Numerator:	Number of respondents who selected “Interested” or “Very interested” in following up on the local agency referral (Q3d)		
Development & testing:			
Past or validated application:			
Citation(s):	Barkin, S., Ip, E. H., Finch, S., et al. Clinician practice patterns: linking to community resources for childhood aggression. <i>Clinical Pediatrics</i> (2006) 45:750-756.		
Notes:	Please be aware that this measure is using only a selected section of an entire survey instrument. Therefore, this individual measure may need to undergo further reliability and validation testing to ensure that it can be applied in a clinical-community relationship setting.		

* This is a measure that was originally applied in a mental health setting, but it could be adapted for a primary care setting.
