Exhibit 5-4. Measure 4: Clinician recall of referral to a local agency (Safety Check Practitioner Post-Visit Survey)

Domain:	Referral process	Element/ relationship:	Clinic/clinician-patient
Instrument:	Safety Check Practitioner Post-Visit Survey		
Purpose:	Clinicians in the <i>Pediatric Research in Office Settings</i> program were trained on providing violence prevention-related community referrals. This measure tracks the clinicians' recall of referrals to local agencies.		
Format/data source:	Health professional survey		
Measure type:	Process	Date:	2006
Preventive service/ USPSTF:	Other–Mental Health*		
Clinical practice:	Primary care–Pediatrics		
Denominator:	Number of respondents to practitioner post-visit survey (Q4)		
Numerator:	Number of respondents who selected “Yes” to Local Agency Resource (Q4d)		
Development & testing:			
Past or validated application:			
Citation(s):	Barkin, S., Ip, E. H., Finch, S, et al. Clinician practice patterns: linking to community resources for childhood aggression. <i>Clinical Pediatrics</i> (2006) 45:750-756.		
Notes:	Please be aware that this measure is using only a selected section of an entire survey instrument. Therefore, this individual measure may need to undergo further reliability and validation testing to ensure that it can be applied in a clinical-community relationship setting.		

* This is a measure that was originally applied in a mental health setting, but it could be adapted for a primary care setting.
